This "README" file accompanies the fifth release of Pixie Scheme III --
Pixie Scheme III version 1.12.

Pixie Scheme III is an implementation of the "R5" version of the Scheme
programming language for the Apple iPad (trademark).  Pixie Scheme III was
written by me, Jay Reynolds Freeman, and is copyright (c) Jay Reynolds
Freeman, 2009-2011.

                 Palo Alto, CA, 94306-0628

A copy of the GNU General Public License is available while running the
program, via the "Warranty" button that appears when you press the "Help"
button at bottom right.  You can also find the license on line at http://
www.gnu.org/licenses/.

#################################

Notes for this Release:

Pixie Scheme III version 1.12 requires at least iOS 4.2.1.

New features include an implementation of rational numbers
in which the numerator and denominator are stored separately,
as 64-bit signed integers, and procedures for working with
continued fractions in the context of those numbers.

```

Bug Reporting:

It all too likely that someone will do things with Pixie Scheme III that I
didn't think to test, or tested incorrectly, and encounter a bug in the
first five minutes.  If so, or if you encounter any other bug or problem,
do let me hear from you.  Contact information for me follows this
paragraph.  Seriously, bug reports from users are ENORMOUSLY valuable:
Please, please send them in.

Contact Information:

EMail: Jay_Reynolds_Freeman@mac.com

Personal Web Site: http://web.mac.com/Jay_Reynolds_Freeman

Check the "Software" page of my web site from time to time for additional
information.

I would love to hear from anyone using Pixie Scheme III.

                         -- Jay Reynolds Freeman
